Hi, I'm a Full Stack Developer passionate about creating modern, responsive, and scalable web applications. I specialize in the MERN Stack (MongoDB, Express.js, React.js, Node.js) and Java, with a strong foundation in Data Structures & Algorithms. I enjoy turning ideas into real-world products, solving complex problems, and continuously exploring new technologies. My goal is to build impactful software that delivers great user experiences while maintaining clean, efficient, and maintainable code.

Education

GLA University, Mathura

2023 – 2027

Bachelor of Technology in Computer Science and Engineering

Projects

ShopNest | MERN Stack E-Commerce Platform

[GitHub](#) | [Live Demo](#)

- Developed a scalable full-stack MERN e-commerce application with dual-channel OTP verification (email + SMS) and JWT-based authentication using httpOnly cookies.
- Built Admin and Customer dashboards for managing products, orders, inventory, and role-based access control.
- Implemented cart, wishlist, product reviews, Razorpay payment integration, and real-time order tracking.
- Created RESTful APIs with Express.js and MongoDB, including aggregation pipelines for sales analytics and CSV-based bulk product upload.
- Deployed the frontend and backend on Vercel with environment variable configuration for production.
- Tech Stack:** React.js, Redux Toolkit, Node.js, Express.js, MongoDB, JWT, Razorpay, Twilio, Nodemailer, Multer, Vercel

Expense Tracker | MERN Stack Finance Dashboard

[GitHub](#) | [Live Demo](#)

- Developed a full-stack personal finance application with secure JWT authentication to track income and expenses in real time.
- Built an interactive dashboard with category-wise expense breakdowns using Chart.js, tested with 500+ transactions.
- Implemented monthly budget limits with automated alerts when spending thresholds are approached.
- Created RESTful APIs with Express.js and MongoDB for transaction CRUD operations and persistent data storage.
- Deployed the frontend and backend on Vercel with environment variable configuration for production.
- Tech Stack:** React.js, Node.js, Express.js, MongoDB, Chart.js, Axios, JWT Authentication, Vercel

TaskFlow | MERN Stack Task Management Tool

[GitHub](#) | [Live Demo](#)

- Developed a full-stack collaborative task management application supporting 100+ tasks across multiple boards.
- Built a Trello-style drag-and-drop interface using React Beautiful DnD with To-Do, In Progress, and Done stages.
- Implemented task prioritization, due-date reminders, and real-time multi-user collaboration updates.
- Created RESTful APIs with Express.js and MongoDB for task, board, and user data management.
- Deployed the frontend and backend on Vercel with environment variable configuration for production.
- Tech Stack:** React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Axios, React Beautiful DnD, Vercel

Skills

Languages: Java, JavaScript, HTML, CSS, SQL

Frameworks/Libraries: React.js, Redux, Node.js, Express.js

Databases: MongoDB, MySQL

Tools/Platforms: Git, GitHub, Postman, VS Code, REST APIs

Core Concepts: Data Structures & Algorithms, OOPs, MERN Stack Development

Achievements

Solved 400+ problems on LeetCode, demonstrating strong proficiency in Data Structures and Algorithms.

Solved 200+ problems on Codeforces through consistent competitive programming practice.

Certifications

Data Structures and Algorithms in Java – Apna College

Full Stack Web Development (MERN) – Apna College
